

Category	Feature / Metric	Description
Emoji Detection	emoji_count	Total number of emoji characters detected in the text
	has_emoji	Boolean flag indicating presence of any emoji
Table Detection	has_table	Detects Markdown or HTML-style table structures
	table_count	Counts Markdown and HTML table occurrences
Writing Style Analysis	word_count	Total number of tokens separated by spaces
	sentence_count	Number of sentences (regex-based)
	avg_words_per_sentence	Mean words per sentence
	is_detailed	Heuristic: detailed if word_count > 50 and avg_words_per_sentence > 15
	has_step_by_step	Detects logical/step-by-step patterns (e.g., "first", "then", "step 1")
Format-Based Features	code_delimiter_count	Number of "```" blocks found
	robust_sentence_count	Sentence count via NLTK (fallback regex if unavailable)
	punctuation_count	Counts all punctuation characters from string.punctuation
Code-Block Detection	has_code_block	True if any code block is detected (markdown, HTML, or heuristic)
	code_block_count	Counts various code block patterns including unclosed or indented blocks
Token Estimation	token_count_estimate	Approximate number of tokens using adaptive heuristic based on script
Language Detection	primary_language	Detected main language of the text
	is_multi_language	True if text contains more than one significant language
	languages	List of detected language codes
	language_distribution	Ratio of languages detected across chunks
	secondary_languages	Languages other than the primary that exceed threshold
